Reasons for Allowance

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Camacho on 06/29/11.

The application has been amended as follows:

In claim 1 after the words "lubricating composition comprising" and before the words and "minimal free water" delete the words "two or more glycols" and replace with "glyceryl polymethacrylate and at least about 10% w/w propylene glycol and at least 30% w/w polyethylene glycol, wherein the amount of said polyethylene glycol is greater than the amount of said propylene glycol".

In claim 1 after the words "warming sensation to the user" delete the words "wherein the lubricating composition comprises glycerol polymethacrylate, at least about 10% w/w propylene glycol, and at least about 30% w/w polyethylene glycol, and wherein the amount of said polyethylene glycol is greater than the amount of said propylene glycol" and replace with ".".

Replace claim 8 with "The condom of claim 1, wherein the lubrication composition has the following formula: 20% w/w propylene glycol, 45% w/w

Art Unit: 1782

polyethylene glycol, 25% w/w mixture of glyceryl polymethacrylate, propylene glycol and water, and 10% w/w glycerin 96%.

In claim 11 after the words "lubrication composition comprising" and before the words "and minimal free water" delete the words "one or more glycols" and replace with the words "glyceryl polymethacrylate and propylene glycol and at least about 30% w/w polyethylene glycol, wherein the amount of said polyethylene glycol is greater than the amount of said propylene glycol".

Claim 13 will be cancelled.

2. The following is an examiner's statement of reasons for allowance: the instant claims have been found allowable over the closest prior art, Harrison et al. (US 2002/0103414) and Ahmad et al. (2003/0211161), for the following reasons:

3. Harrison et al. teach a condom with a lubricant that comprises polyethylene glycol, propylene glycol and glyceryl polymethacrylate, however Harrison et al. teach that the condom also contains a desensitizing agent which teaches away from the instant invention which requires warming sensation to the user upon contact with free water from bodily secretions. It is also noted that Harrison et al. do not teach an embodiment wherein the amount of polyethylene glycol is greater than that of propylene glycol, or embodiments wherein the concentration of polyethylene glycol is over 30% w/w.

Art Unit: 1782

4. Ahmad et al. teach warmth imparting lubrication compositions that comprise polyethylene glycol and propylene glycol in the required concentrations and ratios (page 10 second column right after paragraph 0115). However Ahmad et al. are silent with regards to the inclusion of glyceryl polymethacrylate and further are silent with regards to using the lubricating composition on a condom.

5. Thus it is clear that Harrison et al. or Ahmad et al. alone or in combination do not disclose the present invention.

Further the amendment submitted on 01/04/11 as well as the examiners amendment set forth in the paragraphs above overcomes the double patenting rejection of record

In light of the above the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
